LEADERSHIP

I have been the Founding Director of a university-level, interdisciplinary Center for Collaboration Science (CCS) from 2006 to 2015. By combining Business, Information Science & Technology, Psychology, Communication, and Public Administration, CCS incorporates critical disciplines for the study of collaboration between individuals, teams, and organizations. Upon my departure, CCS had over 20 faculty members representing all UNO colleges and over a dozen PhD student members that pursue their degree with a Collaboration Science focus or topic. Key CCS accomplishments under my leadership include:

- The acquisition of almost \$8M in grants, from a broad variety of sources, including Federal (e.g. NSF), Government (e.g. USSTRATCOM, AFOSR), Private (e.g. MindMixer, Woodmen of the World, Mutual of Omaha), Regional (e.g. Rural Futures Institute), and Non-Profit (e.g. American Telemedicine Association).
- The establishment of a successful annual research conference in which junior and senior researchers share advances in Collaboration Science research. The last three conferences welcomed over 90 participants on average.
- Summer seed funding for over 20 university researchers to develop and execute Collaboration Science research projects. Some projects have resulted in interdisciplinary research advances and have matured into larger project grant applications.
- Funding for over 20 PhD students from the PhD programs in IT and I/O Psychology.
